

MEMBRANE ROOFS

Scan Me

Chevaline Dexx Roof & Deck Membrane

Equus Chevaline Dexx is a New Zealand made, liquid-applied, glass-fibre-reinforced membrane that provides seamless waterproofing for flat and near-flat roofs, walk-out decks, balconies and exterior pedestrian surfaces. Suitable for new construction and refurbishment projects, it delivers durable, flexible performance across a wide range of substrates and detailing conditions.

The acrylic membrane is reinforced with glass fibre mat to create a seamless waterproofing system with excellent adhesion, flexibility and water resistance. Its liquid-applied formulation makes it ideal for complex detailing and irregular roof and deck configurations.

A protective topcoat is selected to suit service conditions, including UV exposure, foot traffic and resistance to ponding. Additional reinforcement can be incorporated for light vehicular traffic. Chevaline Dexx complies with the New Zealand Building Code and carries a 15-year warranty.

Available Colour:

Standard Grey (00A05)

Key Product Benefits:

- Seamless, fully adhered waterproofing system
- Glass-fibre reinforcements for strength and movement accommodation
- Suitable for flat roofs, decks, balconies and wet areas
- Options for UV, foot traffic, and light vehicle traffic topcoats
- Proven performance in New Zealand for over 40 years
- Compatible with varied substrates and complex detailing
- Easy maintenance and re-coatability
- Available in standard and custom colours

Technical Support:

- Project-specific specifications & details
- Approved installation nationwide & onsite QA
- System warranties
