Duo Roof & Deck Membrane

A robust two-layer bitumen membrane system providing exceptional waterproofing for high-demand applications. Engineered for maximum life expectancy and chip retention, Duo is perfect for areas requiring extra durability and protection.

Soprasun Plus Roof & Deck Membrane

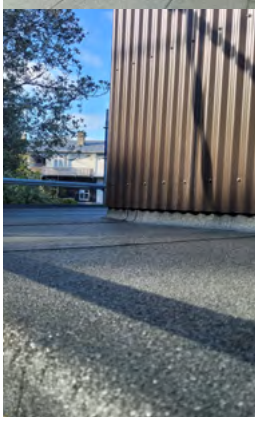
A two-layer bitumen membrane system offering a cost-effective solution for new builds and roof maintenance projects. Soprasun Plus is designed to provide dependable waterproofing on a budget.

Nova-SK Flameless Roof & Deck Membrane

This self-adhering two-layer bitumen membrane system is ideal for situations where open flame installation is not an option. Nova-SK ensures a flameless application while delivering reliable waterproofing for various roof types.

Flagon TPO Roof & Deck Membrane

The Flagon TPO membrane is a single-layer solution, ideal for fast cost effective and flameless installation over large areas, residential roofs and internal gutters.



Design and Support Services

Equus offers expert design guidance and technical support to ensure your waterproofing solution is tailored to your project requirements. From specification to installation, our experienced team delivers quality service to ensure lasting performance.

Our membrane systems are all available as an Equus Soprema Warm Roof

Integrating insulation above the structural deck to enhance energy efficiency. This setup prevents thermal bridging, improves interior comfort, and reduces heating and cooling costs.
