

# EQUUS SOPREMA WATERPROOFING SOLUTIONS FOR FLAT ROOFS & DECKS

Protect your building with Equus and Soprorema's advanced waterproofing systems, engineered for durability and long-lasting performance in even the harshest conditions. Our membrane solutions cater to a variety of flat roof and decking needs, combining quality, durability, and ease of installation.

One system does not fit all, we provide **four** membrane systems to ensure the right solution for every project:

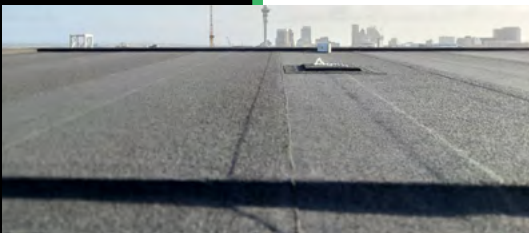

## DUO ROOF & DECK MEMBRANE

A robust two-layer bitumen membrane system providing exceptional waterproofing for high-demand applications. Engineered for maximum life expectancy and chip retention, Duo is perfect for areas requiring extra durability and protection.

## NOVA-SK FLAMELESS ROOF & DECK MEMBRANE

This self-adhering two-layer bitumen membrane system is ideal for situations where open flame installation is not an option. Nova-SK ensures a safe, flameless application while delivering reliable waterproofing for various roof types.

## SOPRASUN PLUS ROOF & DECK MEMBRANE

A versatile two-layer bitumen membrane system offering a cost-effective solution for new builds and roof maintenance projects. Soprasun Plus is designed to provide dependable waterproofing on a budget.

## FLAGON TPO ROOF & DECK MEMBRANE

The Flagon TPO membrane is a single-layer thermoplastic polyolefin solution, ideal for fast and flameless installation over large areas, residential roofs and internal gutters.

## OUR MEMBRANE SYSTEMS ARE ALL AVAILABLE AS AN EQUUS SOPREMA WARM ROOF

Integrating insulation above the structural deck to enhance energy efficiency. This setup prevents thermal bridging, improves interior comfort, and reduces heating and cooling costs.

## DESIGN AND SUPPORT SERVICES

Equus offers expert design guidance and technical support to ensure your waterproofing solution is tailored to your project requirements. From specification to installation, our experienced team delivers quality service to ensure lasting performance.

Contact us to discuss the best solution for your building.
