

EQUUS MATACRYL CARPARK MEMBRANE

Elastomeric waterproofing membrane

Matacryn Carpark System is a liquid applied elastomeric waterproofing membrane designed to waterproof and protect concrete carpark decks. The system is designed for easy application and easy maintenance with an integrated non-skid surface profile for traffic, the **Matacryn Carpark System** also cures very quickly meaning minimal disruption and downtime for the building owner.

The **Matacryn Carpark System** is a multi-layer application. It comprises of medium viscosity, urethane-modified, pre-reacted 100% solid liquid membrane resins based on acrylic monomers. The cured system is a very flexible crack-bridging membrane that retains its flexibility and crack-bridging performance in service even in low temperatures.

Matacryn membrane has a wide range of application areas as well as a carparking membrane. Other applications can include as a bridge deck waterproofing membrane, sub-grade waterproofing including below-grade slabs, pedestrian and vehicular trafficable areas, tunnels, channels and dam structures.

Key Benefits:

- Highly flexible membrane
- Easy to apply using a roller or a squeegee
- Thixotropic version available for vertical surfaces
- Excellent waterproofing properties
- Very high impact and puncture resistance
- Withstands stress and movements in the substrate
- Excellent adhesion to many types of substrate
- Good chemical and abrasion resistance
- Can be applied over a wide range of ambient and substrate temperatures (-10°C to +35°C)
- Can easily be repaired; excellent inter-layer adhesion due to chemical bonding
- Overcoating time not critical
- Fully cured one hour after application

Technical Support:

- Project Specific specifications and details
- On-site quality assurance
- Approved/licensed application nationwide
- Extended Warranties available
