

ALSAN FLEECE 110 P

Non-woven perforated polyester fleece

December 2024

DESCRIPTION:

ALSAN FLEECE 110 P is a non-woven polyester fleece specially designed for use with the ALSAN FLASHING QUADRO waterproofing resin.

ALSAN FLEECE 110 P is used as a reinforcement and ensures that a minimum layer thickness of the ALSAN FLASHING QUADRO waterproofing resin must be applied.

The combination provides a high-quality flexible and crack-bridging waterproofing system.

APPLICATION:

- Apply the ALSAN FLEECE 110 P on top of the 2/3 of the wet resin in place, then install the last 1/3 of the resin on top.
- The ALSAN FLEECE 110 P overlap must be at least 50 mm. Resin must be applied between the overlaps.

For complete information on product installation, please consult your Equus Representative.

PACKAGING:

SPECIFICATIONS	ALSAN FLEECE 110 P
Density	110 g/m ²
Colour	White
Width	200 / 250 / 300 / 350 / 1050 mm
