

# ROOF EDGE PROFILE CLASSIC PLUS

## 110/60

July 2024

**DESCRIPTION:**

The Classic Plus roof edge profile is a pre-manufactured profile that terminates the waterproofing membrane at the highest edge of the roof in a professional, watertight and wind-uplift resistant manner.

The profile is used on top of roof edge curbs of wooden and concrete flat roofs.

**ADVANTAGES:**

- Strong, stable and durable profile that increases the durability of the waterproofing system.
- Increases the bonding of the waterproofing to the edge of the roof deck.
- Special corner design to prevent penetration by horizontal driven rain.
- Available with connection plates, internal and external pre-manufactured welded corners.
- Wind uplift resistant.
- Corrosion resistant.
- Continuous aesthetic finish.
- Provides a dripping point of 15 mm off the wall to prevent water stains to the wall.

**TECHNICAL DATA:**

| Characteristics          |                 |
|--------------------------|-----------------|
| Material                 | Aluminium       |
| Length per profile       | 2500 mm         |
| Width (visible, outside) | 110 mm          |
| Fastening zone           | 45 mm           |
| Dripping edge            | 15 mm from wall |

**INSTALLATION:**

- The waterproofing cap sheet is installed on the top of the roof edge curb.
- The profile is fastened at the roof edge on top of the cap sheet.
- The profile and its fixings are covered by another piece of cap sheet.
- Always refer to the manufacturer’s detail drawing.
