Chevaline Epistixx Flooring

Equus Chevaline Epistixx is a waterborne epoxy flooring system for interior concrete surfaces, providing a hygienic, durable and easy-to-maintain finish for residential, commercial and light industrial environments. Available in a range of system options, Epistixx can be tailored to suit specific performance and slip-resistance requirements.

The system comprises a two-component waterborne epoxy primer with a durable epoxy bodycoat and topcoat, creating a hardwearing finish with excellent adhesion. Its low-odour, fast-curing formulation makes it suitable for occupied buildings and environments where solvent release is undesirable.

AsureQuality certified and compliant with ISO 14644 Clean Room standards, Epistixx is suitable for food processing, agricultural, workshop and commercial applications. Manufactured in New Zealand, the system is supported by certified applicators, technical support and warranty options.

Key Product Benefits:

- Waterborne epoxy flooring system
- Hygienic and easy-to-clean finish
- Fast curing with low odour during application
- High adhesion to concrete substrates
- AsureQuality certified and ISO 14644 Clean Room compliant
- Proven durability with over 40 years in service
- Manufactured in New Zealand

Technical Support:

- Project-specific specifications & details
- Approved installation nationwide & onsite QA
- System warranties

Chevaline Epistixx Flooring

Chevaline Epistixx has four different variants, selections are based on specific project and end use requirements.

Epistixx Rapid
Smooth, medium duty, epoxy floor coating for garage and workshop floors in residential or light commercial situations.

Epistixx Rapid NS (Non-Skid)
Medium duty, epoxy floor coating with aggregate to create a non-skid finish. A solution for light industrial wet floors, or where non-slip is required.

Epistixx SL
Trowel applied, self-levelling epoxy floor coating. Thicker and integrally bonded to the substrate to level out uneven concrete, creating a smooth, level finish.

Epistixx CP
Epoxy carpark coating used to seal and protect new and existing interior concrete carparks, or in high traffic interior workshops.
