

TECHNICAL PRESENTATIONS WITH EQUUS & SOPREMA

Let's get together and share some design experience. Choose your topic and contact us for an in-person or virtual learning session!

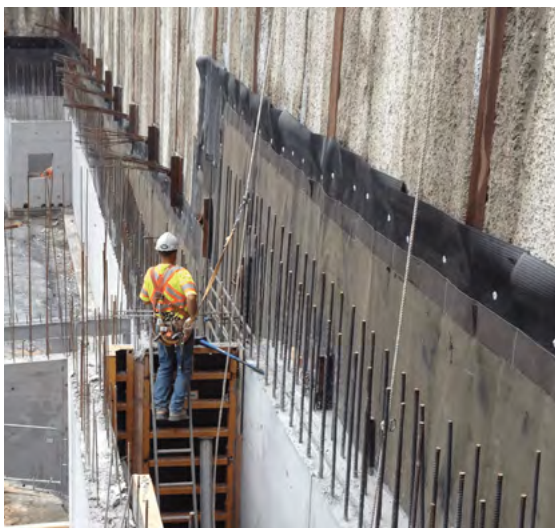

WARM ROOFS

WARM ROOF DESIGN

Discover our warm roof system, CodeMark certified, with a minimum finished fall requirement of 1:80 (0.72°).

- **Stay Ahead:** Explore the latest warm roof innovations, including SOPREMA solutions like SOPRASOLAR and tapered insulation.
- **Design Expertise:** Understand how warm roof details can help you meet H1 Energy Efficiency requirements.
- **Simplify Compliance:** Learn strategies to reduce RFIs (Requests for Information) during the Building Consent process.
- **Upgrade Your Roof:** See how to transform your warm roof into a green roof for added sustainability.

TANKING

BELOW-GROUND WATERPROOFING

Learn more about effective below-ground waterproofing with practical guidance on:

- **Tanking Requirements:** When is tanking necessary, and why?
- **Design Considerations:** Key factors for creating a watertight basement or foundation.
- **Detail Development:** Techniques for crafting watertight construction details.
- **Overcoming Constraints:** Solutions for projects with space or time limitations.

Available in-house with morning or afternoon tea provided, or virtually for remote work. Contact your Technical Consultant for more information.
