**LIGHTFLEX®**

Flexible thin, middle and flow-bed tile adhesive

**Get out  
of the dust!**

**Tile setting –  
healthy and effective applications**

 **SCHOMBURG**

**High yield  
and flexible  
applications!**

## LIGHTFLEX®...

can be used as a thin, middle or flow bed adhesive for securely installing vitrified and earthenware floor tiles, ceramic tiles with low water absorption –  $\leq 0.5\%$  (fully vitrified), clinker and mosaic as well as natural stone materials which are not prone to discoloration or translucent.

# LIGHTFLEX®

Flexible thin, middle and flow-bed tile adhesive

**Get ahead faster –  
without all of the dust.**

### Quality Guaranteed:

- Tested to DIN EN 12004, C2 TE S1 and DIN 12002
- Fulfills the required criteria in the information sheet „Flexible adhesives“
- Excellent for both interior and exterior applications
- Polymer modified

### Advantages:

- Can be used as a repair mortar for thicknesses up to 15mm in one application
- Good sag resistance
- Low consumption
- Packaged in an innovative moisture protected PE-Foil bag
- Can be used with large format fully vitrified tiles
- Versatile – for multiple applications

**Our competence is  
your advantage!**
