
MANUFACTURER DECLARATION

Hereby, Recticel Insulation, located at Zuidstraat 15 in 8560 Wevelgem, Belgium, confirms that the declared thermal conductivity (Lambda D) for Eurothane Silver, as declared on our technical data sheet, is the value after ageing and takes into account correction factors.

This means that the declared thermal conductivity and the thermal resistance of the Eurothane Silver PIR insulation board is constant for the expected lifetime of the warm roof system."

Certified correctly,

Frederick Gheysen
H&E Affairs and Certification Coordinator
Recticel Insulation
