POKER GRID

Shatterproof protective grating for outdoor raised floors

July 2026

DESCRIPTION:

The Equus Jacks Poker Grid is a shatterproof polypropylene grating system designed for outdoor raised flooring applications. Reinforced with glass fibres for enhanced strength and structural stability, it provides a durable support base for a wide range of surface finishes, including ceramic tiles, natural stone, concrete, wood, and synthetic or natural turf.

The **600 x 600 mm, 35 mm** thick modular panels connect quickly and securely using dovetail joints, eliminating the need for mechanical fasteners and ensuring fast installation. Designed for versatility, Poker integrates seamlessly with electrical, irrigation, and underfloor radiant heating systems, while surface access holes allow underlying supports to be adjusted even after the floor has been installed.

Easy to cut and adapt to any layout, the Poker Grid offers a flexible, high-performance solution for raised flooring projects of all shapes and sizes.

FEATURES:

	Dimensions	Weight	Thickness
Poker Grid	600 mm x 600 mm	3.1 kg	35 mm

APPLICATION:

Can be used on all outdoor areas. Also on levelled surfaces, epoxy or membrane insulated areas.
Note: Where used over a warm roof build up, we recommend the use of PIR panels or other thermal insulation, with compressive strength values suitable for raised flooring on pedestal supports. Failure of verification of the suitability of the insulating panel could cause deformation of the insulation and compromise the performance of the waterproofing or the stability of the supports; if there are any doubts about the compressive strength of the panel, we always suggest the use of our Skudo separators for the sole protection of waterproofing.

RAW MATERIALS:

PP Copolymer filled with 30% glass fibres.

ENVIRONMENTAL IMPACT:

Reusable and recyclable – non-hazardous waste.

MECHANCIAL TESTS – Compression Tests on the Poker Grid

Tested in laboratory conditions, the Poker Grid achieved an average breaking load of **9,852 N** when simulating the load footprint of a 600 × 600 mm slab.

WARNINGS AND BANS:

Is the building product/building product line subject to warning or ban under section 26 of the Building Act 2004?	No

MANUFACTURERS CONTACT DETAILS:

Manufacture location	Italy
Legal and trading name of manufacturer	DPS Solving
