

EQUUS JACKS

Scan Me

Equus Jacks

Equus Jacks provide a range of pedestal and grid systems for raised outdoor flooring applications. Designed to support tiles, pavers and timber decking, the range creates level, durable surfaces while allowing concealed drainage and access to membranes and services below.

Suitable for residential and commercial projects, Equus Jacks help overcome falls, uneven substrates and height restrictions. The range includes the adjustable Queen pedestal system for versatile installations and the Lord fixed-height pedestal system for low-clearance applications. The Poker Grid System provides a modular support structure for a variety of paving formats and surface finishes.

Engineered for compatibility and ease of installation, Equus Jacks deliver practical solutions for outdoor living and trafficable spaces.

QUEEN

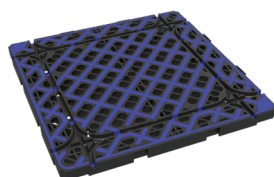

QUEEN PLUS

Simplicity and Versatility

Height adjustable and self-levelling pedestals providing flexible support for raised outdoor flooring applications.

POKER GRID SYSTEM

Freedom to Create

A modular support grid that increases layout flexibility for a variety of paving and decking finishes.

LORD

When Every Millimetre Matters

Fixed-height pedestals designed for projects with limited build-up space and low installation heights.

Technical Support:

- Project-specific specifications & details
- Approved installation nationwide & onsite QA
- System warranties
