Duotherm Warm Roof

EQUUS SOPREMA DUOTHERM Warm Roof system is a high-performance insulated roofing system that combines trusted DUO two-layer waterproofing with thermal insulation and a vapour barrier. Designed for flat roofs, DUOTHERM delivers durable waterproofing, improved energy efficiency and effective condensation control.

The system incorporates a DUO cap sheet and base sheet with rigid PIR or SOPRAROCK mineral wool insulation, creating a continuous thermal layer above the structure. This warm roof configuration helps maintain stable internal temperatures while reducing condensation risk.

Each DUOTHERM specification includes a Condensation Risk Analysis (CRA) and Wind Uplift Report to NZS 1170. The DUO membrane features minimal chip loss and SBS and APP bitumen technology for flexibility, durability and weather resistance. The system is CodeMark Certified, BRANZ Appraised and supported by warranties of up to 25 years.

CodeMark 
CMNZ70151

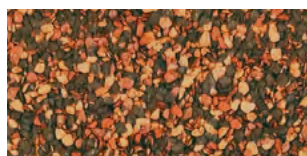

Available Colours:

GW (Grey White)

WGG (White Grey Green)

BO (Brown Oxide)

NOIR (Black)

Key Product Benefits:

Continuous thermal layer for energy-efficient performance

Proven condensation control with dew point outside the structure

Premium DUO two-layer membrane for superior durability

Dual-bitumen technology for flexibility and long-term weather resistance

Pressed slate UV-resistant cap sheet with low chip loss

Suitable for plywood and concrete substrates

CodeMark Certified and BRANZ Appraised

Up to 25-year Equus warranty plus SOPREMA 20-year insurance backed warranty

Technical Support:

- Project-specific specifications & details
- Approved installation nationwide & onsite QA
- System warranties
