Green Roofs

EQUUS SOPREMA Green Roofs combine proven DUO waterproofing technology with vegetation, drainage and growing media to create sustainable roof systems that enhance building performance and visual appearance. Suitable for a range of project types, green roofs deliver environmental, thermal and stormwater management benefits while protecting the waterproofing membrane.

CodeMark
CMNZ70151

BRANZ Appraised
Appraisal No. 685

The system uses the DUO LANDSCAPE cap sheet, a root-resistant modified bitumen membrane incorporating specialised additives and dual reinforcement for long-term performance beneath planted areas. Drainage, filtration and growing media layers are designed to support extensive, simple-intensive or intensive landscaping.

Green roofs can be constructed as conventional cold roofs or as part of a DUOTHERM Warm Roof system, incorporating insulation and vapour control for improved thermal efficiency and condensation management. The system is CodeMark Certified and BRANZ Appraised, with warranties available for up to 25 years.

Available Colour:

WGG (White Grey Green)

Key Product Benefits:

- Ecological and aesthetic benefits – transform rooftops into functional living spaces
- Thermal and acoustic insulation for improved interior comfort
- Stormwater management – slows water release and reduces urban runoff
- Dual-bitumen technology for flexibility and long-term weather resistance
- Suitable for plywood and concrete substrates and warm roofs
- CodeMark Certifiied and BRANZ Appraised

Technical Support:

- Project-specific specifications & details
- Approved installation nationwide & onsite QA
- System warranties
